DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 is allowed.

The following is an examiner's statement of reasons for allowance:

The claims are deemed to be a distinct and non-obvious invention over the cited prior art. The claims comprise an adjustment device configured to raise the spare tire and maintain the initial compression force in response to the change in the initial compression force detected by the detecting device a tire pressure detection unit operatively coupled to the tire hoisting device and configured to determine a change in spare tire pressure of the spare tire based on the change in the initial compression force detected by the detecting device. Furthermore the cited prior art does not teach the method established in claim 11 comprising further raising the spare tire to substantially maintain the initial compression force on the wall of the spare tire and determining a change in the tire pressure of the spare tire based on a change in the initial compression force.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid

processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
